Education

Ajay Kumar Garg Engineering College

Bachelor of Science in Computer Science and Engineering (GPA: 8.2 / 10.00)

10/2021 - 05/2025

Ghaziabad, Uttar Pradesh

Experience

INFOSYS

10/2025 - Present

Specialist Programmer

Hyderabad, India

- Architected an enterprise RAG application using Spring AI and MariaDB Vector to ingest multi-source documents, cutting automated retrieval and query search latency by 35%.
- Developed an operational window configurator using Spring Boot and TypeScript, empowering stakeholders to manage intake limits and improving configuration throughput by 25%.
- Scaled fulfillment microservices within the Delivery Promise Engine (DPE), optimizing order validation logic and reducing promise calculation response time by 30%.
- Engineered high-throughput inventory availability pipelines across distribution nodes, streaming live stock feeds to the global retail storefront and cutting out-of-stock discrepancies by 20%.

NEWGEN SOFTWARE

02/2025 - 06/2025

Software Engineer Intern

Noida, Uttar Pradesh, India

- Built 10+ responsive web pages using **Java**, **SQL**, **JSX**, and **Oracle**, improving UI performance by 30%.
- Collaborated directly with clients to resolve over 20 technical issues, reducing average response time by 40% and increasing client satisfaction with faster ticket resolution.
- Designed and maintained reusable frontend components using JSX and integrated complex SQL queries with Oracle DB, reducing query latency by 25%.

EASYOPS TECHNOLOGIES

10/2023 - 01/2024

Software Engineer Intern

Bangalore, Karnataka, India (Remote)

- Engineered applications using Next.js, React.js, and TypeScript, enhancing user response by 50%.
- Wrote over 100 test cases for each component using React Testing Library, improving code reliability and reducing bugs by 80%.
- Configured and optimized backend services using Node.js, increasing API response efficiency by 35%.

Projects

Sankatmochak | *React.js, Express.js, Nodejs, Socket.io.* | Live Site: [Site](#), Source Code: [GitHub](#)

- Developed a real-time disaster management system, improving emergency response accuracy by 30%.
- Embedded a chatbot and 24/7 SOS feature, streamlining help requests with 99.9% uptime.
- Incorporated an admin panel to monitor and manage all services, providing real-time oversight and enhancing operational efficiency by 25%.

DevVault (Developer tool suite) | *Node.js, Express.js, React.js, Javascript* | Live Site: [Site](#), Source Code: [GitHub](#)

- Constructed a platform with 6 tools for secure code storage, code/text formatting, and note management.
- Implemented a real-time search algorithm to enhance tool discovery, improving efficiency by 40%.
- Ensured an interactive, mobile-responsive UI for streamlined tool access, increasing user engagement by 30%.

Technical Skills

Languages : C/C++, Java, JavaScript, TypeScript, HTML/CSS

Technologies/Frameworks: Agentic Ai, SpringBoot, Spring Ai, ReactJS, Redux, NodeJS, NextJS, Git, GitHub

Databases: MongoDB, MySQL, Firebase, Oracle, VectorDB

Developer Tools: VS Code, Postman, Vercel, Netlify, Render

CS Fundamentals: OOPS, DBMS, Data Structures and Algorithms, Operating system

Achievements

- Achieved a maximum rating of **1700+** on [Leetcode](#) by solving over **400** problems, showcasing strong DSA skills.
- Achieved the **Pupil** rank on [Codeforces](#) with a peak rating of **1243**, reflecting consistent performance in CP.
- Secured **Runner-Up** position at the national-level hackathon **HACK-X NIET**, competing among top teams.
